

- Repeat the same steps to create the following fields:
 - **Employee Name** – Type: String
 - **Email** – Type: String
 - **Department** – Type: String
 - **Location** – Type: String
- After creating all the required fields, click **Save**.
- Verify that the newly created fields are displayed on the **Employee Test** form.

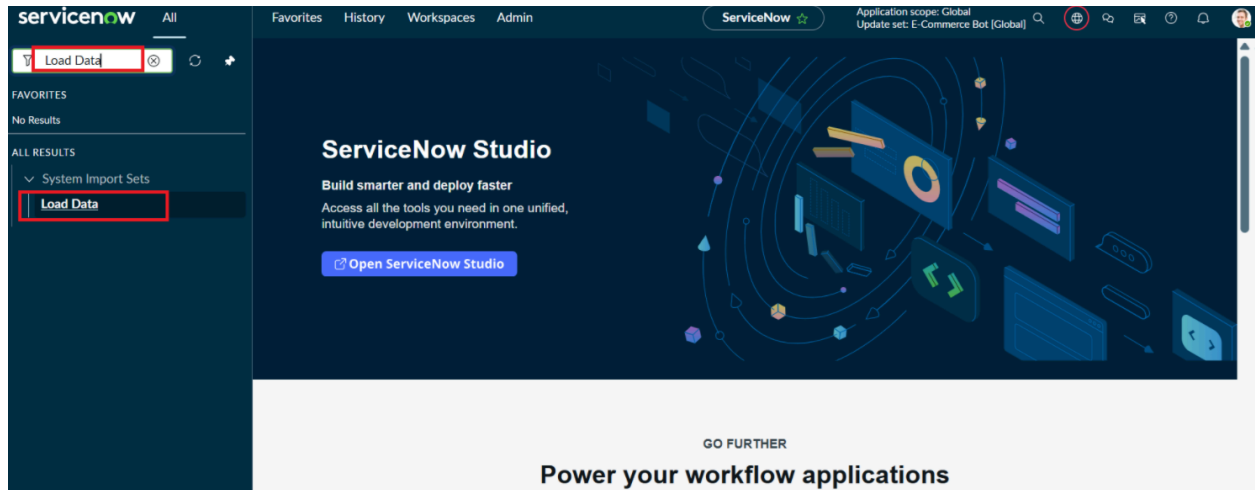

The screenshot shows a mobile application interface for an 'Employee Test' form. The top header bar is light blue and contains a back arrow, a menu icon, the title 'Employee Test', the subtitle 'New record', and a 'Submit' button. Below the header, the form consists of five input fields stacked vertically, each with a label to its left: 'Employee ID', 'Employee Name', 'Email', 'Department', and 'Location'. The 'Employee ID' field is currently active, indicated by a green border and a cursor. At the bottom of the form area, there is a 'Submit' button and a small circular icon on the right.

Click on Submit or Save.

Phase 3: Import Set Table

Navigation:

In Application Navigator → Load Data

Click on Load Data and create an import table

Fill details as shown below

- Label: Employee Import
- Name: u_employee_import (auto populated)

- Click on Submit

Once we click on Submit, we can see the success message as shown below.

Also we need to make sure to click on Create Transform Map.
