Phase 6: Enable Coalesce to Avoid Duplicate Records

- In real projects, the same employee data may be imported multiple times.
- To prevent duplicate employee records, we use **Coalesce**.
- The Coalesce will update the same records with new values if we add and the duplicate values are not inserted.

Steps:

1. Open Transform map Under System LDAP On All menus.
2. Open the Created Transform map , Name is Sample Spreadsheet Import.
3. Under Related list, select the Field maps Section and Make any one field Coalesce True which appears in False.
4. Now save the form.
5. Then again add some data which is in Excel format.

Table Transform Maps
