## PHASE 9 : Add Reports to Dashboard

### Create Dashboard

#### Navigation :

- Open All menus → Search for Dashboards.
- Under Self Service → Click Dashboards.
- On the top right corner Click Create Dashboards or /
- You can create Directly by using the backend name [ PA\_DASHBOARDS.FORM ].
- Then Click New to Create new Dashboards.

- Only the backend name will open the form if the ACL has the **pa\_dashboards** access to **Admin Overrides** True only.
- Then only we have access to the form.

- After Opening the ACL Search the **pa\_dashboards** on Name Column.

| Access Controls   Name   Search       |               |             |        |        |                   |                     |  |
|---------------------------------------|---------------|-------------|--------|--------|-------------------|---------------------|--|
| Name                                  | Decision Type | Operation   | Type   | Active | Updated by        | Updated             |  |
| pa_dashboards                         | Allow If      | write       | record | true   | admin             | 2019-03-25 09:32:03 |  |

| pa_dashboards.*                       | Allow If      | query_range | record | true   | @snc_write_audit@ | 2025-09-08 22:49:16 |  |
| pa_dashboards.group                   | Allow If      | write       | record | true   | admin             | 2016-07-28 06:29:53 |  |
| pa_dashboards.notification_link_label | Allow If      | query_range | record | true   | @snc_write_audit@ | 2025-09-08 22:49:16 |  |
| pa_dashboards.notification_text       | Allow If      | query_range | record | true   | @snc_write_audit@ | 2025-09-08 22:49:16 |  |
| pa_dashboards.owner                   | Allow If      | write       | record | true   | admin             | 2021-11-04 08:32:01 |  |
| pa_dashboards.restrict_to_roles       | Allow If      | write       | record | true   | admin             | 2016-09-08 02:00:29 |  |
| pa_dashboards.restrict_to_roles       | Allow If      | query_range | record | true   | @snc_write_audit@ | 2025-09-08 22:49:16 |  |
| pa_dashboards.restrict_to_roles       | Allow If      | write       | record | true   | admin             | 2018-03-01 08:50:55 |  |

- Now Open the **Create Operation** row.

Access Control | pa\_dashboards | Update | Delete

\* Type: record

\* Operation: create

Decision Type: Allow If

Admin overrides: ☒

Protection policy: -- None --

\* Name: Dashboard [pa\_dashboards] | -- None --

Description: Allow create for records in pa\_dashboards, for users with role maint.

Applies To: Add Filter Condition | Add OR Clause

-- choose field -- | -- oper -- | -- value --

Conditions

Access Control Rules have two decision types, and these types will behave differently depending on conditions.

1. Allow Access: Allows access to a resource if all conditions are met. Additional ACLs may grant access to records where this ACL has not granted access.

2. Deny Access: Denies access to a resource unless all conditions are met. Additional ACLs may not grant access to records where this ACL has denied access.

[More Info](#)

- Then Click Enable the True for Admin Overrides and Update the Form.
- Then the creation of dashboards will be possible by using the backend name.
- Now Open the **PA\_DASHBOARDS.FORM** create dashboard.
- Dashboard name : **Employee Analytics Dashboards.**
- **Save** the Form.

## Add Reports to Dashboards.

### Navigation Steps:

- Open the **Previously Created Reports.**
- On All menus → type Reports Under **Usage and Governance** select **reports.**
- Open the **Employees by Department.**
- Select the **Edit Report** and Click the **Share** button then the right top corner Select the **Add to Dashboards** Option.
- Then Choose the Created **dashboard name** and Click **Add** button.

- Same Like that do the remaining **2 reports** in the same navigation how we added **Employees by Department**.
- The **Employees by Location** and **Employee List Report** these two reports are also added to the created dashboard.

| Title                                   | Table                           | Type | Field Name          | Created by | Updated             |
|-----------------------------------------|---------------------------------|------|---------------------|------------|---------------------|
| Employee List Report                    | Employee Test [u_employee_test] | List |                     | admin      | 2026-01-29 20:57:32 |
| Employees by Location                   | Employee Test [u_employee_test] | Bar  | u_location          | admin      | 2026-01-29 20:42:51 |
| Employees by Department                 | Employee Test [u_employee_test] | Pie  | u_department        | admin      | 2026-01-29 20:39:25 |
| SLA Performance Trend                   | Incident [incident]             | Bar  | opened_at           | admin      | 2026-01-02 02:32:06 |
| Pending Justifications                  | Incident [incident]             | List |                     | admin      | 2026-01-02 01:13:00 |
| Top Assignees with SLA Violations       | Incident [incident]             | Bar  | assigned_to         | admin      | 2026-01-01 22:54:58 |
| Acknowledged vs Unacknowledged Breaches | Incident [incident]             | Pie  | u_sla_acknowledged  | admin      | 2026-01-01 22:47:18 |
| SLA Breaches by Assignment Group        | Incident [incident]             | Bar  | assignment_group    | admin      | 2026-01-01 22:23:49 |
| SLA Breaches by Reason                  | Incident [incident]             | Pie  | u_sla_breach_reason | admin      | 2026-01-01 22:15:34 |

- After Opening the Report Click the **View Report** Button on the right side of the Context menu.

- After Clicking the View Report button, Now Click the **Share** button and then share options are visible on the right side.
- Now click the **Add to Dashboards**.

- Now Add the Dashboard that you created called **Employee Analytics Dashboards**.
- Then Click **Add** button.
- Now the **Report** is added to the **dashboards**.
- Now, Same in the process, add the remaining **two reports** to the **dashboard**.

- From the + icon also we add widgets that our reports from there.
- If we want we can also configure the background color.

- Here the three Reports are added successfully by varying **Department , Location and List Report**.
- We can also restrict the **Users,Groups and Roles** From Share Option.

## Conclusion:

1. This project successfully implemented an automated employee data management solution using ServiceNow Import Sets and Transform Maps, ensuring accuracy, efficiency, and data integrity throughout the employee onboarding and update process.
2. A key enhancement in this project was the use of Coalesce in the Transform Map. By enabling Coalesce on the Employee ID field, the system intelligently identifies existing employee records during every import. This prevents the creation of duplicate records and ensures that repeated imports update existing data instead of inserting redundant entries. As a result, the employee database remains clean, reliable, and consistent, which is critical in real-world enterprise environments where data may be imported multiple times from external systems.
3. In addition to data integrity, the project was extended with Reports and Dashboards to provide meaningful insights and real-time visibility into employee data and import activities. Custom reports were created to track:
